1812 Sir H. Davy *Chem. Philos.* 353 It is evident that there exists a combination of magnesium and chlorine; though this body, which may be called magnesane, has never been examined in a separate state.

Magnesia (mægnī·ʃiă). Also 4 **magnasia**, 5 **magnetia**. [a. med.L. *magnēsia*, a. Gr. ἡ Μαγνησία λίθος, 'the Magnesian stone', a designation of two different minerals: (1) the loadstone; (2) a stone shining like silver, perhaps talc (Liddell & Scott).

It is not clear which of these two senses gave rise to the alchemical use; the brilliant lustre ascribed by the alchemists to 'magnesia' favours the latter view, and the substance seems not to have been identified with the loadstone, in spite of the resemblance of its name to the familiar word *Magnes*.]

†**2.** = Manganese 1. Also *black magnesia*. *Obs.*

[This use prob. arose from the notion that manganese was a form of the 'magnesia' of alchemy. There may, however, have been some early confusion of manganese with loadstone: Pliny *N. H.* xxxvi. lxvi says that loadstone (*magnes lapis*) was used in making glass. In the Latin of early chemistry the word was applied to various other substances: e.g. *magnesia opalina* was a red sulphide of antimony (? = Kermes 3).]

1677 Plot *Oxfordsh.* 79 Magnesia (in the Glass-houses, called Manganese). 1712 tr. *Pomet's Hist. 3. (In early use often †*white magnesia* = mod.L. *magnesia alba*, in contradistinction to *black magnesia*: see 2.) **a.** Originally, and still in popular language, applied to hydrated magnesium carbonate, a white earthy powder, used in medicine as an antacid and cathartic. *Calcined magnesia*: magnesium oxide (pure 'magnesia': see b) prepared by heating the carbonate. **b.** In modern *Chemistry*, an alkaline earth, now recognized as the oxide of magnesium (MgO).

[This application of the word seems not to be connected with the use in sense 1, but to have been suggested by the mod.L. *magnes carneus* 'flesh-magnet', applied *c* 1550 by Cardan (*De Subtilitate* VII, Opera III. 475) to a white earth resembling osteocolla, because it was found to adhere strongly to the lips, and was therefore supposed to have the same attraction for flesh that the loadstone has for iron. The mod.L. term *magnesia alba* seems to have been first employed by Hoffmann in 1722 (*Opera* 1740 IV. 470/2).]

2. A chemical element, one of the 'metals of the alkaline earths', being the base of magnesia.

Though one of the most widely diffused of elements it is found in nature only in composition, and was discovered by Sir H. Davy in 1807 and first successfully separated by Bussy in 1830, as a light silvery metal, ductile and malleable, which is stable in dry air but tarnishes when exposed to moisture, and burns with a blinding white light when held in a flame. 2. A piece of loadstone; also, a piece of iron or steel to which the characteristic properties of loadstone have been imparted, either permanently or temporarily, by contact with another magnet, by induction, or by means of an electric current. A magnet has an axis, at the extremities of which (the 'poles') the attractive power is greatest, and at the middle of which it becomes *nil*. When suspended freely, a magnet assumes such a position that one of its poles (hence called the north pole) points approximately north, and the other (the south pole) approximately south; the like poles of two magnets repel each other, while the unlike poles attract each other.

Magne·to-ele·ctric, *a.* Pertaining to electric phenomena involving electric currents induced in conductors by the relative motion of these conductors with respect to either permanent magnets or electro-magnets.

Introduced, in 1831, by Faraday, who employed it in its most general sense for describing the currents induced by motion of conduction in conjunction with any of the following kinds of magnet: permanent steel magnets, ordinary loadstones, electro-magnets, the earth. He used it tentatively at first in contradistinction to the term *volta-electric*, which he applied to the induction of electricity by turning on or turning off an electric current in a stationary coil.

1831 FARADAY in *Phil. Trans.* (1832) CXXII. 139 As a distinction in language is still necessary, I propose to call the agency thus exerted by ordinary magnets, *magneto-electric* or *magnelectric* induction. *Ibid.* 173 Upon the supposition that the rotation of the earth tended, by magneto-electric induction, to cause currents in its own mass. 1833 *Ibid.* CXXIII. 44, I had the pleasure..of making an experiment, for which the great magnet [a loadstone] in the museum ..and the magneto-electric coil described in my first paper, were put in requisition. 1834 — in *Philos. Mag.* V. 349 When I first obtained the magneto-electric spark it was by the use of a secondary magnet. .. My principal was an electromagnet; Nobili's was, I believe, an ordinary magnet; others have used the natural magnet. 1839 J. F. DANIELL *Introd. Chem. Philos.* 489 Magneto-electric is the converse to electro-magnetic action. 1854 G. BIRD & C. BROOKE *Elem. Nat. Philos.* xvii. (ed. 4) 421 *note*, Similarly, electro-magnetic induction would mean the development of magnetism by a current, and magneto-electric induction, that of a current by magnetism. 1881 MAXWELL *Electr. & Magn.* II. 208 This is the electromotive force which must be supplied from sources independent of magneto-electric induction.

b. **Magneto-electric current.** Used by Faraday to distinguish currents generated mechanically by magneto-electric induction from those generated in a voltaic battery.

1831 FARADAY in *Phil. Trans.* CXLII. (1852) 137 On the employment of the Induced Magneto-electric Current as a test and measure of Magnetic Forces.

c. **Magneto-electric machine.** First used by Faraday, in 1831, to denote a machine generating currents by magneto-electric induction. By later writers employed in variously limited senses.

The appellation continued to be used in Faraday's wide sense by various writers down to about 1867, when the improvements of Wilde, Wheatstone, Siemens, Ladd, Varley and others attracted much attention, and the term 'dynamo-electric machine' was introduced by Brooke. This term was defined by Brooke himself to denote in general a machine 'in which dynamic energy is employed to produce an electric current' (*Proc. Roy. Soc.* XV. 409, *footnote*); by others, however, it has been applied to signify only such machines as embodied the principle of self-excitation and did not contain any permanent magnets. Those who adopted the latter usage limited the meaning of 'magneto-electric machine'; some including under that term only the machines with permanent magnets of steel, while others included under the name both these and the machines with separately-excited electro-magnets. The present tendency is to confine the term strictly to the machines with permanent steel magnets. Some writers define magneto-electric machines as simply old-fashioned or rudimentary kinds of dynamos; others treat the terms as synonymous. On the other hand some writers treat 'magneto-electric machine' as a generic term, of which dynamo-electric machines form a sub-class.

1832 FARADAY in *Phil. Trans.* (1832) CXXII. 160 Two rough trials were made with the intention of constructing magneto-electric machines. *Ibid.* 163 [Under heading *Terrestrial Magneto-electric Induction*, describes as magneto-electric machines discs of copper caused to revolve, and thereby generate electric currents under the magnetic influence of the earth.] 1866 CROOKES in *Q. Jrnl. Sci.* XII. 504 Magneto-electric machines, with revolving armatures, in which electro-magnets had been substituted for permanent magnets, had been constructed. 1867 WHEATSTONE in *Proc. Roy. Soc.* XV. 369 The magneto-electric machines which have been hitherto described are actuated either by a permanent magnet or by an electro-magnet. 1878 *Proc. Inst. Civ. Engin.* LII. 63 M. Alfred Niaudet remarked that he did not agree with..the distinction between dynamo-electric and magneto-electric machines. In all these instruments mechanical power was converted into electricity by the action of magnetism; consequently all were both magneto-electric and dynamo-electric. 1878 J. N. SHOOLBRED *Pres. State Electric Lighting* 6 For the older form, where permanent magnets are employed, the term 'magneto-electric' machine has been retained. 1880 A. SIEMENS in *Jrnl. Soc. Telegr. Engin.* IX. 93 A constant and permanent magnetic field is, therefore, of paramount importance, and it can be produced in the way proposed by Mr. Wilde in 1863 for magneto-electric machines by employing a separate machine for exciting the field-magnets of one or more similar machines. 1882 S. P. THOMPSON in *Jrnl. Soc. Arts* XXXI. 120 The arbitrary distinction between so-called magneto-electric machines and dynamo-electric machines fails when examined carefully. In all these machines a magnet, whether permanently excited, independently excited, or self-excited, is employed to provide a field of magnetic force. And in all of them dynamic power is employed. 1887 W. B. ESSON *Magneto- & Dynamo-electric Machines* 22 In all the machines yet described, the electric currents were induced by means of steel magnets, or, as in Wilde's machine, by magnets that were magnetised by the current produced in another machine. Such machines are usually called 'magneto-electric' machines, to distinguish them from the 'dynamo-electric' machines. 1889 *Chambers's Encycl.* IV. 146/2 The term 'dynamo-electric' was at first applied to distinguish those machines which were self-exciting from 'magneto-electric' machines, which had permanent magnets to give the field; but this distinction is no longer maintained. 1892 J. W. URQUHART *Dynamo-Constr.* 2 A magneto-electric machine—an apparatus in which steel magnets are used to furnish the 'magnetic field'—is not strictly by common consent called a dynamo.

Mail (mēl), *sb.*² Now only *Sc.* Forms: 1–3 **mal, 3 mol, 3–6 male, 5 maile, 7 maille, 7–8 meal, 5–7, 9 maill, 6– mail.** [Late OE. *mál*, a. ON. *mál* neut., speech, agreement = OE. (poet.) *mǽl* speech; prob. a contracted form of the word which appears as OHG., OS. *mahal* assembly, judgement, treaty, OE. *mæ·del* meeting, discussion, Goth. *mapl* meeting-place. (Cf. MALLUM.) In sense, however, the Eng. word seems rather to represent the ON. derivative *málde* wk. masc., contract, stipulation, stipulated pay; cf. Ormin's *málde* accus.

The word has survived only in Sc. and northern dialects, and hence its phonetic form is northern. If it had come down in midland or southern use its form would have been *mole* (mōul).]

Main (mēin), *sb.*[3] Also 6–7 maine, mayne. [Of obscure history.

From the early use in antithesis with *by* (which seems in the game of hazard to have meant the same as *chance* in the later language) the word would appear to be an absolute or elliptical application of MAIN *a.* (Cf. MAIN CHANCE.) The usual view that the word is a. F. *main* 'hand' has no evidence; quot. *c* 1685–8 in sense 3 prob. embodies a mere etymological speculation.]

1. In the game of hazard, a number (from five to nine inclusive) called by the 'caster' before the dice are thrown.

'If he "throws in", or "nicks", he wins the sum played for from the banker or "setter"...If the caster "throws out" by throwing aces, or deuce, ace (called crabs), he loses...If the caster neither nicks nor throws out, the number thrown is his "chance", and he keeps on throwing till either the chance comes up, when he wins, or till the main comes up, when he loses' (*Encycl. Main (mēin), *a.* Forms: [1 mæzen-], 3 mein, 4–7 mayn, 5 *Sc.* mano, 5–7 mayne, 6–7 maine, maigne, 5– main. [Prob. partly repr. It is doubtful whether the development of the Eng. word owes anything to the influence of OF. *maine, maigne* great:—L. *magnus.* The OFr. word is purely poetical, and occurs chiefly as an epithet of kings and nobles; it may prob. have influenced the use of *main* by ME. poets, but the only unequivocal evidence of its adoption is the 15th c. 2. *spec.* The action of procuring the release of a prisoner by becoming surety ('mainpernor') for his appearance in court at a specified time. Chiefly in phr. *to let* or *receive to* (or *in*) *mainprize*, *to deliver upon* (or *by*) *mainprize*, *to nim under mainprize* [=AF. *laisser par*, *mettre par meynprise*]. *Without bail or mainprize*: with no permission to obtain release by finding sureties. *Writ of mainprize*: see quot. 1768.

By the legal antiquaries of the 16th c., the 'taking in hand' etymologically implied by AF. *mainprise*, med.L. *manucaptio*, was supposed to denote the act of 'receiving into friendly custody' the person who would otherwise have been committed to prison (cf. BAIL *sb.*[1] 3), and the later definitions of *mainprise* and *mainpernor*, e.g. those of Cowell and Blackstone (see MAINPERNOR) are worded in accordance with this misapprehension.

9. *Cap* (or †*hat*) *of maintenance*: a kind of hat or cap formerly worn as a symbol of official dignity or high rank, or carried before a sovereign or a high dignitary in processions.

The sense of *maintenance* here is obscure. Cf. the app. equivalent *cap of estate, cap of dignity* (see Cap *sb.* 4 f). In the earliest example (*c* 1485) the *hat of maintenance* is worn by the members of the Holborn Quest. Afterwards the *cap of maintenance* is mentioned by contemporaries as having been given by the Pope thrice to Henry VII and once to Henry VIII; in 1551 it is referred to as one of the insignia of a prince. In the 17th c. and later it appears chiefly as borne, together with the sword, before the Lord Mayor, and before the Sovereign at his coronation. A kind of cap, with two points like horns behind, borne in the arms of certain families either as a charge or in the place of a wreath, is described by heralds as a 'cap of maintenance'; cf. quot. 1700.

2. Preceded by a possessive, *your, his, her, the king's, the queen's*; sometimes with a qualifying epithet, as (*most*) *sacred, gracious,* † *royal.* Used as an honorific title in speaking to or of a king, queen, emperor, or empress. In this use *Your Majesty* is a respectful substitute for the pronoun *you*, and *His, Her Majesty* (abbreviated H. M.) may be either prefixed to such designations as *the King, the Queen, King Edward VII*, etc., or substituted for them; so, in modern use, *Their Majesties*, when more than one royal person is meant. Also, with distinguishing epithet: *His, Her Imperial Majesty* (abbreviated H. I. M.), said of an emperor or empress; *His Britannic Majesty* (abbreviated H. B. M.), the King of Great Britain (and Ireland); *His Catholic Majesty*, the King of Spain; *His Most Christian Majesty* (Hist.), the King of France; in jocular language, *His Satanic Majesty*, the Devil, Satan.

This use, common to all the Rom. langs., and from them adopted into all the living Teut. langs., descends from the Latin of the later Roman empire (*tua, vestra majestas*). In England it occurs, in its Latin form, from the 12th c., though examples of the vernacular form are not met with before the 15th c. It was not until the 17th c. that *your majesty* entirely superseded the other customary forms of address to the sovereign. Henry VIII and Queen Elizabeth were often addressed as 'Your Grace' and 'Your Highness', and the latter alternates with 'Your Majesty' in the dedication of the Bible of 1611 to James I.

The English syntax of this word (as of the other abstract nouns similarly employed as titles, e. g. *highness, lordship, grace, excellency*) is somewhat inconsistent. Although *Your Majesty*, like *His, Her Majesty*, requires the following verb to be in the 3rd person sing. to agree with the sb., this principle of concord is not applied to the pronouns, as in Fr. and some other langs. The neuter pronouns *it, its, which*, cannot be used with reference to a foregoing (*Your, His, Her*) *Majesty*; either the titular phrase must be repeated, or the pronoun must be the same as if the simple form ('you', or 'the king', 'the queen') had been used instead of the periphrastic form.

[Com. WGer.: OE. *macian* = OFris. *makia*, OS. *macon* (LG., Du. *maken*), OHG. *mahhôn* (MHG., mod.G. *machen*), app. f. **mako-* fit, suitable (see Make *sb.*[1]). On this view the primary sense would be 'to fit, arrange'; but in the earliest known stages of the WGer. tongues the verb corresponded generally to the L. *facere* in such of its senses as were not expressed by Do. The MSw. *maka* to make, construct (mod.Sw. *make* to move), Da. *mage* to manage, arrange, appear to have been adopted from LG.

Many senses which later Eng. shares with continental Teut. are not recorded in OE., or not until near the end of that period; possibly the vb. originally had some of these meanings, but was displaced in the literary dialect by synonyms. Materials are wanting for a genealogical arrangement of the senses; the order of the main branches in the following scheme has been adopted on grounds of convenience. The word is not very frequent in OE.; the most prominent uses are in causative and factitive applications (see 48, 49, 52) and in the phrase *hit macian* 'to make it' = to act, behave (see 68).]

I. Senses in which the object of the verb is a product or result.

*To bring into existence by construction or elaboration. (Not common until late in OE.; the L. *facere* is usually rendered by *gewyrcan*.)

1. *trans.* To produce (a material thing) by combination of parts, or by giving a certain form to a portion of matter; to construct, frame, fashion.

Formerly common in various applications in which vbs. of more specific meaning are now almost universally employed; used, e. g. for to build or erect a house, town, column, ship, to paint a picture, to carve or sculpture a statue.

59. With sbs. expressing the action of vbs. (whether etymologically cognate or not), *make* forms innumerable phrases approximately equivalent in sense to those verbs. In some of these phrases the obj.-noun appears always without qualifying word; in others it may be preceded by the indefinite article, or by a possessive adj. relating to the subject of the sentence. When standing alone, the combination of *make* with its object is equivalent to a verb used *intr.* or *absol.*; but in many instances the obj.-noun admits or requires construction with *of*, and this addition converts the phrase into the equivalent of a transitive verb. In this Dictionary these phrases are usually illustrated (and if necessary explained) under their respective sbs.; but a selection of them is given here in order to exhibit the variety of applications. (For the illustration of those phrases which are enumerated without quotations, see the sbs.)

Many of the ME. phrases of this type are literal renderings of phrases with L. *facere* or F. *faire*, the sb. being often adopted from one of those languages. In early use a gerund in *-ing* was often the obj. of *make*, but this is now rare.

Mal- (mæl), *prefix*, formerly often written male- (but pronounced as one syll.), chiefly represents the F. *mal* adv.:—L. *male* ill, badly; rarely, as in *maltalent*, it represents the OF. *mal* adj.:—L. *malus* bad. In its advb. use the prefix occurs in many adoptions from Fr., which are sometimes combinations with vbs., as *maltreat*; sometimes nouns of action formed from such combinations, as *malfeasance*; and sometimes combinations with adjs., where the prefix serves to reverse the favourable connotation of the word, as *maladroit, malcontent.* In imitation of these adopted words, *mal-* has from the 16th c. been prefixed to many Eng. words, to convey the sense 'ill', 'wrong', 'improper(ly)'. The words thus modified are chiefly nouns of action, as in *malpractice*, and many physiological terms, as *malassimilation, malformation*; occasionally adjs. and vbs., as in *maloderous, malappropriate.* The formations that have a permanent character are treated in their alphabetical places; examples of the frequent use of the prefix in the creation of nonce-words are *mal-accident, -application, -appointment, -associa-*

6. *Law.* a. Wrongful intention generally. b. That kind of evil intent which constitutes the aggravation of guilt distinctive of certain offences (*esp.* of murder), or which deprives some act, on the face of it unlawful, of a justification or excuse that might otherwise have been allowed.

The first meaning mentioned under b was originally expressed by the AF. phrase *malice purpensé or prepense*, which in modern legal language appears as *malice prepense* (see PREPENSE *a.*) and in the translated form *malice aforethought*. In early use the phrase occurs in many anglicized forms: *malice prepensed*, *purpensed*, *pretensed* (also *prepensed*, etc. *malice*); occasional variants found in non-technical writers are *malice propense* (17th c.), *malice propensive* (Fielding), *malice perpended* (Charles Lamb). For examples see the various adjs.

See also quots. 1825-1901 below, and quot. 1889 s.v. MALICIOUSLY 4. It is not possible to frame any such general definition as would show what legally constitutes 'malice' or proof of 'malice' in particular kinds of cases.

POLLOCK *Law of Torts* (ed. 6) 24 Such abuse [of privilege allowed by law on special occasions and for special purposes, where the act is done not in good faith or for the advancement of justice, but from evil motives such as personal enmity] is called 'malice' or 'express malice', and deprives the act of justification... The words 'malice', 'malicious', and 'maliciously' were formerly used in pleading, and thence in forensic and judicial language, in many places where they were superfluous.

Mamma 1**, mama** (mămă·). [A reduplicated syllable often uttered instinctively by young children, who are in many countries taught to use it as their word for 'mother' (esp. where the ordinary word in the language begins with *m*).

The Indogermanic type **mammā*, as a child's word for mother, is found as Gr. μάμμη, L. *mamma* (whence It. *mamma*), OSl., Russian МАМА, Lith. *mama*, Irish *mam* (O'Brien); also in Welsh *mam*, which is the only word for 'mother', though *modr-* survives in some compounds. The F. *maman* (COTGR. 1611 *mammam*), like the earlier *mam-ma* (1584 in Hatz.-Darm.), appears to be an independent adoption of the instinctive infantine utterance; the Sp. *mamá*, Pg. *mamãe*, may perhaps be from French.

Apart from the two 16th c. quots. in which the word is used with reference to a child's first attempt to speak, the Eng. *mamma* has not been found earlier than near the end of the 17th c., after which time it rapidly became common. The Eng. word of the 17–18th c. (rimed by Shadwell with *awe*) prob. represents a spoken form adopted from the F. *maman*; the spelling may have been suggested by Latin or It., or it may possibly have been originally meant to express the native English form (ma·mă, mə·mă), which is still current in many dialects. In educated use, so far as is known, the stress has in England always been on the last syllable; in the United States, however, the stress *ma·mma* is the more usual; a prevailing U. S. pronunciation is represented by the spelling *momma*, occasionally used in novels. The spelling *mama*, sometimes used in the 18th c., became somewhat common after 1800, and is especially frequent in the novels printed *c* 1830–50. It is now rare.]

A word employed as the equivalent of *mother*: chiefly used in the vocative, or preceded by a possess. pronoun (as 'my mamma'); also without article in the manner of a proper name (e.g. 'Mamma is well'); less usually with *a*, *the*, or in *plural*.

The status of the word has always been the same as that of PAPA 1. In the 18th c., although *ma·mma* as used by young children was probably common, *mamma* seems to have been confined to the higher classes, and among them to have been freely used not only by children but by adults of both sexes. In the 19th c. its use was much extended, and among the lower middle class was a mark of 'gentility'. Latterly it has in England become unfashionable, even as used by children.

Aramaic ממון *māmōn*, ממונא *māmōnā* riches, gain (frequent in the Targums). Hence also Syriac *māmūnā*, Goth. *mammōna* wk. masc., mod.F. *mammon, mammone.*

The N. T. phrase *μαμωνᾶς τῆς ἀδικίας* (Eng. version 'mammon of unrighteousness'; earlier versions, 'mammon of iniquity', 'wicked mammon', etc.) represents exactly the Aramaic *māmōn di-r'shaS*, 'riches or gain of wickedness' (Targ. Hab. ii. 9), and approximately the more common *māmōn di-sh'qar*, 'riches of falsehood'.]

1. The Aramaic word for 'riches', occurring in the Greek text of Matt. vi. 24 and Luke xvi. 9–13, and retained in the Vulgate. Owing to the quasi-personification in these passages, the word was taken by mediæval writers as the proper name of the devil of covetousness. This use appears in English in the 14-16th c., and was revived by Milton (*P. L.* I. 678, II. 228). The word does not occur in the N. T. translations of Wyclif and Purvey (who substitute *richessis*), but it was used by Tindale (1526-34) and subsequent translators, with the exception of those of the Geneva version. From the 16th c. onwards it has been current in English, usually with more or less of personification, as a term of opprobrium for wealth regarded as an idol or as an evil influence.

The forms in the various Teut. langs. belong to two declensional stems, the OTeut. forms of which would be **mann-* and **mannon-*. (The ON. *man* str. neut., slave, may possibly be related, but the connexion is doubtful.) The OE. plural *mɑnn* is the regular descendant of OTeut. **mannīz*, and the dative *mɑnn* of OTeut. **manni*, from the cons.-stem **mann-*.

I[illegible]y regarded as certain (on the ground of the sup[illegible]ondence with Skr. *manu* man) that the *nn* of [illegible] from an original *nw*. The now [illegible] are to be compared respectively with the [illegible] grade of the suffix of a stem [illegible]th the Gothic form would be **manan-*. This hypothesis accounts for the otherwise obscure form *mana-* which the word assumes in Gothic compounds; if it be correct, the Teut. word and the Skr. *manu* cannot have any nearer relation than that of independent derivatives of a common root. They have been usually referred to the Indogermanic **men-, *mon-*, to think (see MIND *sb.*), so that the primary meaning of the sb. would refer to intelligence as the distinctive characteristic of human beings as contrasted with brutes. Many scholars, however, regard this as intrinsically unlikely to have been the original sense, though no plausible alternative explanation has been suggested.

In all the Teut. langs. the word had the twofold sense of 'human being' and 'adult male human being', though exc. in Eng. it has been mainly superseded in the former sense by a derivative (Ger., Du. *mensch*, Sw. *menniska*, Da. *menneske*: cf. MANNISH *sb.*).]

I. 1. A human being (irrespective of sex or age); = L. *homo*. In OE. the prevailing sense.

†**a.** In many OE. instances, and in a few of later date, used explicitly as a designation equally applicable to either sex. *Obs.*

In OE. the words distinctive of sex were *wer* and *wif*, *wæpman* and *wif-man*.

b. In the surviving use, the sense 'person' occurs only in general or indefinite applications (e.g. with adjs. like *every, any, no*, and often in the plural, esp. with *all, any, some, many, few*, etc.); in modern apprehension *man* as thus used primarily denotes the male sex, though by implication referring also to women.

The gradual development of the use of the unambiguous synonyms *body, person, one*, and (for the plural) *folks, people*, has greatly narrowed the currency of *man* in this sense; it is now literary and proverbial rather than colloquial.

In *Zoology*: The human creature or race viewed as a genus (*Homo*: in the present classification consisting of only one species, *H. sapiens*) of animals.

In OE. a few examples occur with the definite article. The Eng. use of the word as a quasi-proper name, without article, differs from the practice of most of the modern European langs. (cf. F. *l'homme*, G. *der mensch*), and from the usage of Eng. itself with regard to other generic names of animals; cf. 'the anatomical structure of *man* and that of *the lion*'.

MANDRAGORA—MATTER.

FREE CHURCH INSTITUTION, CALCUTTA SHELF LIBRARY

BY

NOTE.

THIS double section includes 1679 Main words, 561 Special Combinations explained under these, and 1062 Subordinate entries; in all 3302. The *obvious combinations* recorded and illustrated number 622, making a total of 3924. Of the Main words 369 (22%) are marked † as obsolete, and 125 (7½%) are marked ‖ as alien or not fully naturalized.

Comparison with Dr. Johnson's and some recent Dictionaries gives the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.*	'Century' Dict.	Funk's 'Standard'.	Here.
Words recorded, *Mandragora* to *Matter* sb.	326	1408	1741	1760	3924
Words illustrated by quotations	260	339	571	161	2782
Number of illustrative quotations	853	670	1432	213	14664

* Including the Supplement of 1902.

The number of quotations in the corresponding portion of Richardson is 649.

The words treated in this instalment are mainly of Romanic and Latin origin. Many of them belong to the earliest strata of adoptions from Old French, and rival the native words in the multitude and diversity of their senses: see, for example, the articles on *manner*, *march* sbs.[2] and [3] and vbs., *market*, *mass* sb.[2], *master*, *matter* (of the article on the last-mentioned word only the first quarter is included in the present section). Other Romanic words, interesting on account either of etymology (on which in many instances of new light has been thrown) or of sense-development, are *manganese*, *manger*, *mangle* v.[1], *mangonel*, *manipulate*, *manor*, *mansion*, *manufacture*, *manure*, *map*, *marble*, *marcasite*, *marchpane*, *marmalade*, *marquis*, *marriage*, *marry*, *marshal*, *martinet*, *martingale*, *martlet*, *marvel*, *mask* sb.[2], *mason*, *masquerade*, *mass* sb.[1], *mastic*, *mastiff*, *match* sb.[2] There are a few Greek derivatives, chiefly obtained through mediæval Latin, as *margarite*, *martyr*, *mathematic* and its cognates, though a few are modern scientific formations, as *manometer*, and the words beginning with *masto-*.

The native English and Scandinavian words, if compounds and derivatives be left out of the account, are not numerous: the most important are *mane*, *manifold*, *many*, *mar*, *mare* (two sbs.), *mark* (sb.[1] and vb.), *marrow*, *marsh*, *mash* sb.[1], *mast* (two sbs.), *match* (sb.[1] and v.[1]). The native English *maslin*[1], like its Romanic homophone *maslin*[2], is remarkable for the extraordinary variety of its forms. The Teutonic languages of the continent have furnished *mangel-wurzel*, *mangle* (sb. and v.[2]), *margrave*, *mart* sb.[4] (the history of which is now for the first time correctly traced), *mate* sb.[2] The only Celtic words are *mant* (v. and sb.[2]) and *mart* sb.[3]

As in the earlier portions of M, words from Oriental, African, and American languages are more than ordinarily abundant. In most instances the etymology of these words will be found to be more accurately or more completely given than in other dictionaries.

Manage (mæ·nėdʒ), *v.* Forms: *α.* 6 **manege, mannadge,** 6–7 **mannage,** 6– **manage.** *β.* 6–8 **menage.** [Recorded earlier than the cognate MANAGE *sb.*, and prob. directly ad. It. *maneggiare* to handle, esp. to manage or train (horses) = Sp. *manejar*, F. *manier*—vulgar L. type **manidiare*, f. L. *man-us* (It., Sp. *mano*, F. *main*) hand.

Although the etymological form *manege* appears in our earliest example, the ending was, as in the sb., already in the 16th c. assimilated to the common suffix -AGE. The form *menage* in early examples is taken from the sb.; but in the late 17th and early 18th c. it was chiefly used where the sense closely approaches that of the F. *ménager* to use carefully, to husband, spare, f. *ménage* household. This Fr. vb. certainly influenced the sense-development of the Eng. word; indeed, in the writings of Dryden and his contemporaries, there are frequent instances of *manage* (as well as of *menage*) which can only be regarded as conscious gallicisms.]

At Rouen, a ring-shaped cake of bread (in ordinary Fr. called *couronne*) is known as *manchette*, lit. 'cuff' (Robin *Patois normand*, and Littré *Suppl.*), but this name (which may be of recent origin) is obviously descriptive of shape, while the Eng. word in early use denotes a certain quality of bread. The identity of sense with PAINDEMAINE, DEMEINE, *maine-bread* (see MAINE *sb.*) suggests the possibility of etymological connexion with those words. The word might represent an AF. diminutive f. **demenche*:—L. *dominica*, or it might be an Eng. compound f. MAINE *sb.* + CHEAT *sb.*[2]; but either supposition involves some difficulties.]

1. Any plant of the genus *Mandragora*, native to Southern Europe and the East, and characterized by very short stems, thick, fleshy, often forked, roots, and fetid lance-shaped leaves.

The mandrake is poisonous, having emetic and narcotic properties, and was formerly used medicinally. The forked root is thought to resemble the human form, and was fabled to utter a deadly shriek when plucked up from the ground. The notion indicated in the narrative of Genesis xxx, that the fruit when eaten by women promotes conception, is said still to survive in Palestine.

1. A black mineral (now recognized as an oxide of a metal, to which its name has been transferred: see sense 2), used from ancient times in glass-making, and now in many industrial processes. Also called **black manganese,** †*glass-maker's manganese.* The name has been also applied with qualification to other ores of the metal: **grey m.**, = MANGANITE 1; **horn m.**, *corneous m.* [G. *horn-mangan*, Jasche], an impure manganese silicate akin to photicite; **red m.**, = RODOCHROSITE; **white m.**, manganese carbonate.

As the name is in chemical use now restricted to the metal (sense 2), its older application survives only in commercial and industrial use. The black manganese of commerce is usually a mixture of various oxides, but the term is considered to apply esp. to manganese dioxide, MnO_2, which is the valuable ingredient in the mixture.

MDu. *mange* (=MHG., mod.G. *mange*), a mangle, in early use also a mangonel. The Du. and G. word is ultimately from the Gr. *μάγγανον* (see MANGONEL), but its history has not been precisely traced: cf. the med.L. forms *mango*, *manga*. For the sense cf. It. *mangano*, 'a kinde of presse to press buckrom, fustian, or died linnen cloth, to make it have a luster or glasse' (Florio 1598).] A machine for rolling and pressing linen and cotton clothing etc. after washing; in its older form, an oblong rectangular wooden chest filled with stones, worked backwards and forwards by a rack and pinion arrangement (or, earlier, by straps wound round a roller worked by a handle), and resting upon two cylinders, which were thus rolled with great pressure over the fabric spread upon a polished table beneath; now consisting of two or more cylinders working one upon another. Cf. CALENDER *sb.*[1] 2.

The possession of a mangle, for the use of which a small sum was charged, is, among the poorer class of English cottagers, a common means of earning money. The question 'Has your mother sold her mangle?' (quot. 1836–7) was at one time the commonest piece of 'chaff' used by London street-boys.

Mangrel, Mangrie: see MONGREL, MANGERY.

Mangrove[1] (mæ·ŋgrōv). Also 7 **mangrowe, mangrave.** [Of obscure history. Synonymous words app. connected are Pg. *mangue* (16th c.), Sp. *mangle* (Oviedo 1535, who applies it to S. American species), whence F. *manglé* (16th c.), later *mangle* (now applied to the fruit only, the name of the tree being *manglier*). The Malay *mangi-mangi* mangrove (not now current in the Malay Peninsula, but recorded in early Dicts.) is usually regarded as the ultimate source, but it is difficult to account on this view for the early appearance of Sp. *mangle* referring to America. The Eng. forms *mangrowe*, *-grave* are unexplained (but cf. the word-play in quot. 1613); the mod. form is doubtless due to assimilation to GROVE *sb.*]

1. Any tree or shrub of the genus *Rhizophora*, or the allied genus *Bruguiera* (N. O. *Rhizophoraceæ*); esp. the Common Mangrove, *R. Mangle.*

The genus *Rhizophora* is extensively represented in both hemispheres. The species are all tropical, growing in the mud on the sea-shore down to low-water-mark; they have large masses of interlacing roots above ground, which intercept mud and weeds, and thus cause the land to encroach on the sea. *Red mangrove* (see also 2 d): a name given to a West Indian variety of the Common Mangrove, formerly separated as *R. Candel*; also in Australia, to *Bruguiera rheedii.*

1613 W. C. *Plain Descr. Barmudas* F 2 b, Amongst all the rest there growes a kinde of tree called Mangrowes, they grow very strangely, & would make a man wonder to see the manner of their growing. 1657 R. LIGON *Barbados* 72 The mangrave is a tree of such note as she must not be forgotten. 1697 DAMPIER *Voy.* I. 151 Low swampy Land, overgrown with Red Mangroves. 1772–84 *Cook's Voy.* (1790) I. 193 A large lagoon, by the sides of which grows the true mangrove, such as is found in the West-Indies. 1845 DARWIN *Voy. Nat.* xxi. 498 The channel..was bordered on each side by mangroves, which sprang like a miniature forest out of the greasy mud-banks. 1889 MAIDEN *Usef. Native Plants* 316 *Bruguiera Rheedii*..Red Mangrove.

¶ Ligon's description of the 'mangrave' confuses it (as Sloane pointed out) with the Mahoe (see MAHOE[1] 1). Hence some later writers have applied the name mangrove-tree to the Mahoe.

2. Applied, on account of similarity of habit and appearance, to various other plants. **a.** Any tree or shrub of the genus *Avicennia* (N. O. *Verbenaceæ*), esp. the White Mangrove (*A. officinalis*) found in Brazil and Australasia, and the Black or Olive Mangrove (*A. nitida*) of tropical America and Africa. **b. Button mangrove,** a small W. African tree, *Conocarpus erectus* (N. O. *Combretaceæ*). Also called Zaragoza mangrove (*Treas. Bot.* 1866). **c. White mangrove,** *Laguncularia racemosa* (N. O. *Combretaceæ*), found in the West Indies. **d.** In Australasia (see Morris *Austral Eng.* 1898) used with various qualifications in the names of certain plants indigenous or cultivated there, as **milky mangrove,** *Excœcaria Agallocha* (N. O. *Euphorbiaceæ*); **native mangrove** (in Tasmania), a leguminous tree, *Acacia longifolia*; **red mangrove** (see also 1), *Heritiera littoralis* (N. O. *Sterculiaceæ*); **river mangrove,** an East Indian tree, *Ægiceras majus* (N. O. *Myrsineæ*), naturalized in Australia; **rope mangrove,** *Hibiscus arboreus.*

-mania, a terminal element, repr. Gr. *μανία* MANIA in composition.

There were in Gr. a few compounds in *-μανία* (rare and chiefly post-classical), expressing the general sense 'a certain kind of madness', or 'the state of being mad after some object', and corresponding as nouns of quality or condition to the related adjs. (a much more frequent formation) in *-μανής* = '-mad'. Examples are *γυναικομανία* mad passion for women, *ἐρωτομανία* love-madness, *ἱπποπομανία* mad love for horses, *ὑδρομανία* 'water-madness', hydrophobia. In the 16th and 17th c. a number of quasi-Greek compounds, denoting species of mania, were invented and used in medical Latin, and some of these, as *nymphomania*, have been adopted in Eng. Other technical or quasi-technical words, formed in the 19th c., are *kleptomania*, *lypemania*, *megalomania*. In the 17–18th c. the currency of F. *manie* in the sense of a 'craze' or passion (e. g. for some pursuit, or the collection of some class of objects) suggested the formation of a number of quasi-Gr. compounds such as *bibliomanie* mania for books, *méltromanie* mania for metre, *mélomanie*

mania for song; and hybrid formations such as *Anglomanie* mania for things English, *tulipomanie* mania for tulips. Several of these words have been adopted in Eng. with the ending *-mania*, and in the 19th c. it became somewhat common to invent nonce-words with this ending. Examples are **bancomania**, a craze for establishing banks; **Graiomania** [L. *Grai-us* Greek], passion for things Greek; **Italomania**, wild enthusiasm for Italy; **Queenomania**, (applied by Southey to the popular devotion to the cause of Queen Caroline); **scribblemania**, a craze for scribbling. The sbs. in *-mania* have, actually or potentially, correlative sbs. in **-maniac**; the words in -MANE are of rare occurrence, and are viewed as Gallicisms.

Manna1 (mæ·nă). Also 1 **monna**, 2–3 **manne**, 4 **mana**. [a. late L. *manna* neut. indecl. (later also fem. *a* stem), a. Hellenistic Gr. *μάννα* neut. indecl. (LXX and N. T.), ad. (? through Aramaic *mannā*) Heb. מָן *mān* (whence Gr. *μάν*, L. *man*, occurring more frequently than the longer form in the LXX and Vulgate O. T.: see Man *sb.*3).

G. Ebers (*Durch Gosen zum Sinai*), gives plausible reasons for believing that the Ancient Egyptian *mannu* denoted the exudation of *Tamarix gallica.* As the Arab. *mann* has the same sense, it seems possible that the Heb. word may represent the name anciently current in the Sinaitic wilderness for this natural product, which in many respects agrees with the description of the miraculous manna, and which is still locally regarded as a dew falling from the sky. The etymological tradition or conjecture preserved in Ex. xvi. 15 represents the word as having originated from the question *man hû?* 'what is it' (in Aramaic or supposed archaic Heb.), which grammatically admits of being interpreted 'It is *mân*'. (Cf. the Vulgate, l. c.: Dixerunt ad invicem: Manhu, quod interpretatur, 'quid est hoc?')

The word has been adopted in most versions of the Bible, and appears in figurative uses in the literature of most of the countries of Christendom. Cf. Goth., OHG. (MHG., mod.G.), Du., Sw., It. *manna*, F. *manne*, Sp. *maná*, Pg. *mannâ.*

Whether the Gr. *μάννα*, L. *manna*, fem., meaning a grain of frankincense (sense 9 below), is connected with this word is uncertain, though an oriental origin for it is probable.]

3. A unit of English territorial organization, originally of the nature of a feudal lordship.

The doctrine of the lawyers of the 17th c. is that a manor consists essentially of land held in demesne by the lord, to which is attached a seignory over freehold tenants sufficient in number (the minimum is variously stated as two or three) to constitute the court, called at a relatively late time the court-baron, which the lord is bound to hold and the tenants to attend. (The manor was often defined from the point of view of its relation to the lord, as an estate in land consisting of demesnes and services.) This restriction of the meaning of the word is destitute of early authority (though the kind of complex estate described probably existed from the 12th century), but is the basis of the present application. As the status of tenant in fee under a mesne lord is practically obsolete, a manor now consists of the lord's demesne (if any exists) and of lands from the holders of which he has the right to exact certain fees and fines, and within which he has certain privileges. A 'court customary' is held in all manors where there are copyhold or customary tenants of the demesne. A manor is usually named from the principal township, as 'the manor of Barnstaple'.

d. In some of the American colonies, authority was given by royal charter for the creation of 'manors' after the English model, with courts-baron and seignorial rights. The Dutch governors of what is now the State of New York also granted 'manors', with certain hereditary privileges now abolished. (See quot. 1870 and Patroon 4.) The term still continues to be applied to certain districts in the U. S. which were 'manors' in colonial times.

2. *Law.* A species of criminal homicide of a lower degree of criminality than murder; now defined as criminal homicide without malice aforethought.

In etymological meaning there is no difference between *manslaughter* and *homicide* (L. *homicidium*, F. *homicide*, both used in early Eng. law-books). In its modern technical use, *manslaughter* corresponds generally to the 'simple homicide' of early Law French and Law Latin writers, which was used in contradistinction to 'murder' (though the distinction is not identical with the modern one), and ordinarily implied criminality.

According to the modern interpretation, *manslaughter* is committed when one person causes the death of another either intentionally in the heat of passion under certain kinds of provocation, or unintentionally by culpable negligence or as a consequence of some unlawful act.

In Scotland the term corresponding to *manslaughter* is 'culpable homicide'.

The generic name *Manucodia* (? a misprint for *Manucodiata*) was used by Boddaert 1783 in describing a species since discovered to belong to a distinct genus, for which English ornithologists adopted Boddaert's name. In English *manucode* was then restricted to the birds of this genus, which has since been divided into two.
